SUMMARY

I am a passionate full-stack developer who loves solving real-world problems using software. I have experience working in different teams in high-tech IT companies, which helps me to look at problems from different angles. I enjoy writing clean and readable code, and creating websites that are easy to navigate. My goal is not only to grow as an individual, but also to help my team grow and succeed.

SKILLS

PROGRAMMING LANGUAGES: JavaScript, NodeJS, Ruby, TypeScript, HTML, CSS
FRAMEWORKS / LIBRARIES: React, Redux, ExpressJS, Rails, Next.js, jQuery, Saas (SCSS), Tailwind CSS, EJS
DATABASES: PostgreSQL, SQL Server, MongoDB
TESTING: Jest, Mocha, Chai, Storybook, Cypress
OTHERS: LINUX, Git, Github, Heroku, AWS technologies (EC2, S3, Lambda, API Gateway, DynamoDB), Agile Methodology

PROJECTS

Campr · Oct. 2022
Campr is an app inspired by AirBnB that allows people without access to camping gears to rent gears from locals with ones to spare.
Tech stack: React, Node.js, Express, PostgreSQL

jungle-rails · Sept. 2022
A mini e-commerce application built with Rails 6.1 . This app allows users to add a variety of plants to their carts and order them.
Tech stack: Rails, PostgreSQL, cypress

Appointment Scheduler · Sept. 2022
A React based app enabling students to book new/ edit previously booked appointments with their chosen mentor in real-time.
Tech stack: React
Test: storybook, cypress, Jest

Buy/Sell Listing Website · Aug. 2022
An online store app where admins can post different types of products to sell, remove items, or mark them as SOLD! Users are able to favorite items to check up on them later, filter items by price, and also send messages to admin to negotiate the price. Admins can reply to the user by the app and email.
Tech stack: Express, Node, jQuery, PostgreSQL

EMPLOYMENT

Pishro Cloud Computing
Project Manager · Mar. 2018 to July 2019
● Managing project plans using Jira, MSP, and agile practices to ensure each team meets their objectives and product delivery timelines.
● Delivering product tests with the technical team to detect software bugs.
● Effectively collaborating with DevOps, Front-End, and Back-End teams.
● Contributing functional and technical support to end-users in testing environments including investigating system errors and using Horizon (Open Stack) to launch virtual machine instances.

Sharif ICT Innovation Center
Project Management Assistant · Aug. 2017 to Mar. 2018
● Providing vital daily and periodic project progress and status reports to top management and stakeholders.
● Performing quality assurance and testing to ensure the quality of the system is maintained.
● Managing tickets and logging daily IT issues to successfully addressing the users' issues on time.

Senobar Printing House
Project Coordinator · Oct. 2014 to July 2015
● Creating WBS and managing time, scope, and cost constraints.
● Preparing project documents and generating reports for stakeholders.
